Experience

Software Engineer Intern June 2026 – July 2026
ArtifexOne *Barcelona, Spain (Remote)*

- Built Taolatt Real Estate CRM, shipping 23 full-stack features from backend APIs to React interfaces while defining engineering standards that scaled the platform.
- Built a reusable React component library with shadcn/ui, React Hook Form, and Zod, supporting scalable state management, filtering, infinite scroll, and multi-select workflows.
- Integrated messaging and booking services, delivering WhatsApp/email workflows with deduplication, idempotent retries, and real-time calendar synchronization via webhooks.

Backend Engineer Intern Feb 2026 – June 2026
Actrun *MaryLand, U.S (Remote)*

- Built a deterministic attachment pipeline for chat/Slack, hydrating images/PDFs/text directly into LLM context.
- Set up local and staging test suites, plus a dedicated Slack bot for development/testing workflows.
- Fixed intermittent Postgres SSL drops with retry-with-backoff logic, and resolved OAuth/WebSocket issues across X, LinkedIn, and Slack integrations.

Full Stack Developer Intern September 2025 – December 2025
Eas Legal Services *Bengaluru, India (Remote)*

- Designed a robust RESTful API with Express and Prisma ORM, handling complex data relationships for user authentication, document management, and organization workflows.
- Implemented a robust Advanced Role-Based Access Control (RBAC) multi-role authentication system utilizing JWT for secure, scalable user access management.
- Deployed the application on AWS using nginx , EC2 instances, and S3 buckets for optimized performance and scalability.

Projects

Nabhya | *React Native, Expo, NestJS, PostgreSQL, Drizzle, Supabase, Razorpay* |
Live Link

- Adapted X's open-source *For You* feed architecture into a personalised recommendation pipeline with candidate generation, filtering, weighted scoring, and diversification across **4 content types** and **3 feed views**.
- Ranked up to **600 candidates** using location, cause interests, follows, urgency, recency, and **6 engagement signals**; added impression-aware down-ranking to reduce repeated recommendations.
- Load-tested the personalised feed at **20 virtual users**, achieving **16.3 RPS** (**977 requests/minute**) with **0% request failures**, **489 ms p95**, and **953 ms p99** latency.

Silent Parcel | *NextJS, Shadcn, Tailwind CSS, AppWrite, GitHub Actions, Pipelines* |
Live Link | **Repo**

- Engineered end-to-end encrypted file storage using Appwrite, ensuring secure data hosting and preventing server-side access to sensitive content.
- Designed a collaborative file management workflow with client-side decryption and editing (add/remove/update within zip archives), maintaining seamless updates and encryption before upload.
- Implemented scalable, secure live-coding and ephemeral chat rooms with full end-to-end encryption.

Education & Certifications

Vidyalankar Institute Of Technology Mumbai, India
B.Tech in Information Technology (GPA: 9.53/10) *2023 – Present*

AWS Certified Cloud Practitioner Score: 898/1000 **AWS Certified AI Practitioner** Score: 929/1000

Technical Skills

Languages: JavaScript, TypeScript, Python, Go
Frameworks/Libraries: Django, React, Next.js, Tailwind CSS, Hono, Express.js, React Query
AI Developer Tools: AI Agents, MCP Servers, Agentic Workflows, LLM Integrations, Tool Calling, Context Engineering, Git, GitHub Actions, Docker, Postman
Cloud Computing: AWS (EC2, S3, IAM, Lambda, CloudFront), Docker, Nginx, Linux, Redis, Cloudflare
Databases/ORMs: MongoDB, Prisma, Drizzle
System Design: Microservices, Distributed Systems, System Design, Caching, Message Queues (BullMQ), API Design, Scalability, Load Balancing

Achievements

Open-Source Contributions See more: singhaman.me/opensource

- Contributed **15+ pull requests and issue reports** across open-source projects, including work at **Graphify Labs (YC W26)**.
- Earned merged contributions in CNCF ecosystem projects, including **Kubernetes Minikube** and **Helm's helm-www**.
